RELEVANT WORK EXPERIENCE

Snap

Research Intern

May 2022 - Dec 2022

- Conducted and led a research project as part of the Computational Social Science team, as well as collaborated with other team research efforts.
- Developed an R package to properly estimate multilevel, dyad data with large datasets in a regression framework.
- Trained embedding models to extract latent cultural preferences across users and used machine learning classification techniques to understand how different users relate to each other in their communication styles.

Columbia University

Teaching Assistant

Sept 2018 - May 2023

- Taught a grad-level lab on using R, statistics and causal inference
- Taught undergrad-level sections and graded for Methods for Social Science (taught interviews, ethnography, experiments and survey design), Global Urbanism and Work and Gender.

James R. Jones, Princeton/Rutgers

Research Assistant

February 2020 - May 2022

- Cleaned and restructured pay-roll data for statistical analysis
- Statistical analysis of data and creation of weekly data visualization and memos for non-technical audience.
